WHAT IS CLAIMED IS:

1. Use of verapamil in the manufacture of a medicament for treating chronic rhinosinusitis (CRS) in combination with mometasone,

wherein an effective amount of the verapamil and mometasone are to be administered to a subject in need thereof.

2. The use of claim 1, wherein the subject has CRS with nasal polyps (CRSwNP).

3. The use of claim 1 or 2, wherein the verapamil and mometasone are to be administered systemically.

4. The use of any of the preceding claims, wherein the verapamil and mometasone are to be administered locally to the subject's nasal passage and sinuses.

5. The use of claim 4, wherein the verapamil and mometasone are to be delivered to the subject's nasal passage and sinuses by nasal irrigation.

6. The use of claim 5, wherein the nasal irrigation is high volume, low positive pressure nasal irrigation.

7. The use of claim 6, wherein the verapamil and mometasone are to be delivered to the subject's nasal passage and sinuses by high volume, low positive pressure nasal irrigation with a saline solution.

8. The use of claim 7, wherein the saline solution is an isotonic saline solution.

9. The use of claim 7, wherein the saline solution is a hypertonic saline solution.

10. The use of claim 9, wherein the hypertonic saline solution is about a 2% w/v saline solution.

11. The use of claim 1 or 2, wherein the verapamil and mometasone are to be administered to the subject as a verapamil and mometasone eluting implant placed in the subject's nasal passage or sinuses.

12. The use of claim 11, wherein the implant is bioabsorbable.

13. The use of claim 1 or 2, wherein the verapamil is to be administered to the subject's nasal passage and sinuses by nasal irrigation and the mometasone is to be administered to the subject as a mometasone eluting implant placed in the subject's nasal passage or sinuses.

14. The use of any of the preceding claims, wherein the subject having chronic rhinosinusitis was identified by endoscopy.

15. The use of any of the preceding claims, wherein the subject having chronic rhinosinusitis was identified by computed tomography.

16. The use of any of the preceding claims, wherein the subject having chronic rhinosinusitis was identified by observing the subject's symptoms and duration of symptoms.

17. The use of any of the preceding claims, further comprising monitoring the efficacy of the treatment by endoscopy.

18. The use of any of the preceding claims, further comprising monitoring the efficacy of the treatment by computed tomography.

19. The use of any of the preceding claims, further comprising monitoring the efficacy of the treatment by observing the subject's symptoms and duration of symptoms.

20. The use of any of the preceding claims, wherein any nasal polyps present in the subject are to be surgically removed.

21. The use of any of the preceding claims, wherein the verapamil and mometasone are to be administered in further combination with an antibiotic.

22. The use of claim 21, wherein the antibiotic is selected from erythromycin or a pharmaceutically acceptable salt thereof, doxycycline or a pharmaceutically acceptable salt thereof, tetracycline or a pharmaceutically acceptable salt thereof, penicillin or a pharmaceutically acceptable salt thereof, beta-lactam or a pharmaceutically acceptable salt thereof, macrolide or a pharmaceutically acceptable salt thereof, fluoroquinolone or a pharmaceutically acceptable salt thereof, cephalosporin or a pharmaceutically acceptable salt thereof, and sulfonamide or a pharmaceutically acceptable salt thereof.

23. Use of verapamil in the manufacture of a pharmaceutical composition for treating chronic rhinosinusitis in combination with mometasone; and

wherein the pharmaceutical composition is to be delivered to a subject's nasal passage and sinuses.

24. The use of claim 23, wherein the pharmaceutical composition is to be delivered to the subject's nasal passage and sinuses in a liquid, nebulized, or aerosolized form.

25. The use of claim 23 or claim 24, wherein the pharmaceutical composition further comprises an antibiotic.
