SANITARY NAPKIN PROVIDED WITH WINGS

A sanitary napkin (1) with a pair of wings (11) includes a topsheet (2), a backsheet (3) and an absorbent core (4) disposed therebetween, the wings (11) including a portion of the backsheet (3) extending bilaterally of the napkin and a breathable sheet material bonded to the portion by means of bonding lines (6) extending in a transversely direction of the napkin and arranged intermittently in a longitudinal direction of the napkin.

Refer to Fig. 1.
