}
304 {
    </nvp> //
    Name-value pair //
    Name //
    Value //
    (as many pairs as exist in the array)
    Name-value arrays of additional info (might include info about other, related objects)
    Name-value pair array
    Name-value pair
    Name //
    Value //
    Name-value pair
    Name //
    Value //
    (as many pairs as exist in the array)
    Span info (used to indicate that this event is part of a larger "span" of events) - lists all spans of which this is a part
    Occurrence span
    Span ID (numeric)
    Span name (string)
    Like log level: FATAL, ERROR, WARN, INFO, DEBUG (but numeric values representing those levels)
    Type of span, usually the default type and so not included
    Occurrence span
    Span ID (numeric)
    Span name (string)
    Like log level: FATAL, ERROR, WARN, INFO, DEBUG (but numeric values representing those levels)
    Type of span, usually the default type and so not included
    (as many spans as exist for this, which is usually none but which could be dozens)
}
