

ABSTRACT

ANTIFOULING COATING COMPOSITION, ANTIFOULING COATING FILM,
5 ANTIFOULING SUBSTRATE AND METHOD FOR PRODUCING THE SAME, AND
ANTIFOULING METHOD

[Object]

An organosiloxane antifouling coating composition
10 containing a pyrithione salt is provided which can form
antifouling coating films resistant to deterioration in
antifouling properties even under environments where the
coating films are susceptible to sunlight influence.

[Solution]

15 An organopolysiloxane antifouling coating composition
includes a curable organopolysiloxane (A), a pyrithione salt
(B), and titanium oxide (C), the titanium oxide (C) being
surface-treated with a compound including at least one selected
from the group consisting of silicon compounds (C1), zirconium
20 compounds (C2) and zinc compounds (C3).
