(54) Title: CAPSULES

(57) Abstract: A method of making core-shell capsules containing a water-immiscible liquid, comprising the steps of (a) dispersing into the water-immiscible liquid a crosslinking agent that is inactive under the conditions of the dispersion; (b) emulsifying the resulting dispersion into an aqueous solution of a crosslinkable hydrocolloid; and (c) activating the crosslinking agent to cause the hydrocolloid to crosslink at the dispersion/solution interface. The method is simple and provides capsules that can be cold-loaded. The capsule material may be made of vegetable-derived materials.
