Claims

Claim 1. A method for stabilizing a protein of interest, comprising contacting the protein with a cereal meal, wherein the protein of interest is an endolysin.

Claim 2. A non-aqueous composition comprising a protein of interest and a cereal meal, wherein the protein of interest is an endolysin.

Claim 3. A method according to claim 1, or a non-aqueous composition according to claim 2, wherein the endolysin is specific for Staphylococcus, preferably *Staphylococcus aureus*.

Claim 4. A method according to claim 1 or 3, or a non-aqueous composition according to claim 2 or 3, wherein the cereal meal comprises in weight between 50% to 85% carbohydrates, between 10 and 25% protein, between 0% and 12% lipids, between 0% and 10% beta-glucans and between 0% and 15% fibre.

Claim 5. A method according to any one of claims 1, 3 or 4, or a non-aqueous composition according to any one of claims 2 to 4, wherein the cereal is selected from the group consisting of maize, rice, wheat, barley, sorghum, millet, oats, rye, triticale, quinoa, spelt and fonio.

Claim 6. A method according to any one of claims 1, 3 to 5 or a non-aqueous composition according to any one of claims 2 to 5, wherein the cereal meal is oat meal, preferably colloidal oat meal, more preferably Oat Com™, Oat Silk™, or DermiVeil™.

Claim 7. A method according to any one of claims 1, 3 to 6, or a non-aqueous composition according to any one of claims 2 to 6, wherein the endolysin and the cereal are mixed in an aqueous liquid, which is subsequently lyophilized.

Claim 8. A stabilized endolysin obtainable or obtained by a method according to any one of claims 1 to 7.

Claim 9. A non-aqueous composition comprising the stabilized endolysin according to claim 8.

Claim 10. A non-aqueous composition according to anyone of claims 2 to 7 or claim 9, wherein the composition is a cream.

Claim 11. Use of a of a non-aqueous composition according to claim 10, in the manufacture of a medicament for the treatment of atopic dermatitis.

Claim 12. Use of a cereal meal as defined in any one of claims 1 to 7 for stabilizing an endolysin.

Claim 13. A composition comprising:

- cereal meal, preferably oat meal, more preferably colloidal oat meal, even more preferably Oat Com™, Oat Silk™, or DermiVeil™, and

- an endolysin.
