(54) Title: BEVERAGE PRESERVATION AND DISTRIBUTION CAN, ALSO USABLE FOR THE EXTEMPORANEOUS PREPARATION OF BEVERAGES BY EXTRACTION AND/OR INFUSION

(57) Abstract: The beverage can presents immediately below the lid a first chamber (38) not initially containing beverages ready for use, but intended to receive the final beverage, said first chamber being separated by a sealed baffle (14; 214; 314) from a second chamber (16) which already contains, a drinkable liquid (18); said sealed baffle presenting a housing (20; 120; 220; 334) constructed to receive a filtering device (24; 124) provided with a tube (22; 122) intended to dip into the interior of the chamber (16) containing the liquid (18). Means are provided to enable the consumer to dispose the filtering device (24; 124) in the utilization condition in which communication is established between the two chambers (38 and 16) via said filtering device (24; 124) such that, when the can is subjected to the action of a heat source, the liquid contained in the lower chamber (16) is transferred into the first chamber (38) by passing through said substance (28), to give rise to the formation of said beverage.
