For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(54) Title: ANTI-FC-GAMMA RIIB RECEPTOR ANTIBODY AND USES THEREFOR

(57) Abstract: The present application describes antibodies that selectively bind human FcgammaRIIB, with little or no binding to other human FcgammaRs, e.g., human FcgammaRIIA. The invention also provides isolated bispecific antibodies comprising an antibody that selectively binds FcgammaRIIB, and a second antibody that specifically binds an activating receptor. Various uses, including therapeutic uses, for those antibodies are also described, including administration with anti-tumor antibodies and methods of inhibiting immune responses and suppressing histamine release.
