(54) Title: PORTABLE APPARATUS FOR ANALYSIS OF A REFINERY FEEDSTOCK OR A PRODUCT OF A REFINERY PROCESS

(57) Abstract: The present invention provides a portable apparatus for analysis of a refinery feedstock or a product of a refinery process, said apparatus comprising: (a) a first analytical device for determination of the boiling point profile of a refinery feedstock or a product of a refinery process, and (b) at least two further analytical devices each of which contains or is associated with a database and an algorithm, at least one of said devices being adapted for determination of the density of the refinery feedstock or product of a refinery process, and at least one of said devices being adapted for determination of the total acid number of the refinery feedstock or product of a refinery process.
