

ROTARY TOOL INCLUDING A CUTTING BLADE AND CUTTING APPARATUS
COMPRISING THE SAME

Abstract of the Disclosure

A cutting apparatus comprising a rotary shaft (34) which is detachably fitted with a rotary tool (36) including a cutting blade (44). The rotary tool (36, 136) itself or a storage case (162) storing the rotary tool has an indicator (56, 156) which may be a bar code and shows the characteristic properties of the cutting blade. A reading means such as a bar code reader for reading the above indicator showing the characteristic properties of the cutting blade is installed on the cutting apparatus.
