(54) Title: STRUCTURAL PROFILE

(57) Abstract

An elongate structural profile has a base (3) and a pair of side walls (4) projecting from the base along its length, the base being provided with formations (9) extending longitudinally of the profile. At least a major part of the remaining surface area of the profile is formed with a multiplicity of localised individual formations (10). Also disclosed are a method of producing surface formations on sheet or strip material and apparatus for carrying out the method.
