(54) Title: CUFF FOR WATCH

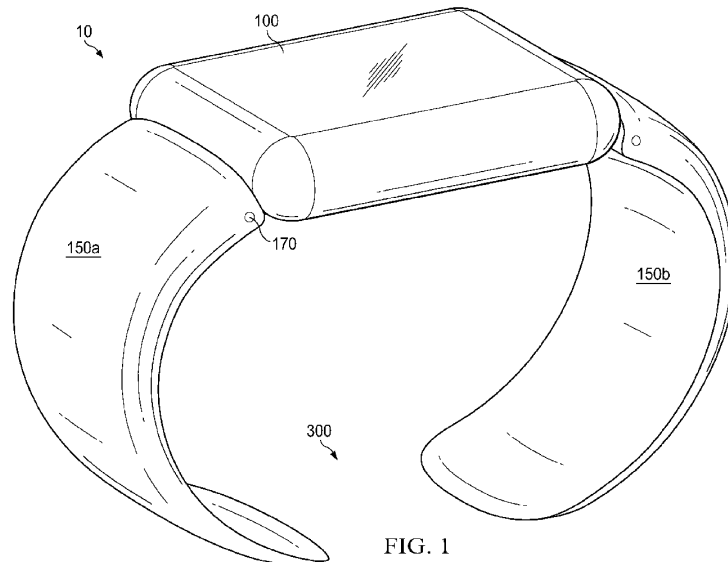

FIG. 1

(57) Abstract: A cuff for a watch includes a pair of arcuately shaped arms and a pair of connectors, each detachably connected to a different side of the body of a watch. Each arm is detachably coupled to a different connector. The pair of arms cooperate to define an opening opposite the body of the watch when the arms are coupled to the connectors and the connectors are coupled to the body of the watch. The arms laterally flex outward to allow an object to pass through the opening without breaking.
