(54) Title: METHOD, DEVICE AND KIT PARTICULARLY FOR APPLYING A COSMETIC PRODUCT

(57) Abstract: A method for the external application of any cosmetic product by using a syringe and a hollow needle for external application having a blunt tip. The combination of this type of needle with syringes such as the ones described hereinafter and with any cosmetic product is new and allows to apply the cosmetic product in a manner that is advantageous because it is precise and accurate both in terms of quantity of applied product and in terms of application site. Other aspects of the invention are constituted by the use of syringes provided with hollow needles having a blunt tip to apply a cosmetic product externally on the human body, and by a kit that comprises at least one syringe and at least one needle such as the ones described, together with at least one cosmetic product to be applied, wherein the cosmetic product can be already contained in the syringe or, as an alternative, can be contained in an appropriately provided container supplied together with the kit.
