

FIG. 5

FIG. 4

FIG. 7

FIG. 6

Legend For FiguresFigure 1

- | | |
|---|-----------------------------|
| 1 : Perimeter of inflatable container | 5 : Gas Inlet |
| 2 : Inflatable container to contain gaseous stimulant | 6 : Plastic delivery tubing |
| 3 : Rubber based sealant | 7 : One-way valve |
| 4 : Gas outlet | 8 : Stapling points |

Figure 2

- | | |
|---|-----------------------------|
| 1 : Perimeter of inflatable container | 5 : Gas Inlet |
| 2 : Inflatable container to contain gaseous stimulant | 6 : Plastic delivery tubing |
| 3 : Rubber based sealant | 7 : One-way valve |
| 4 : Gas outlet | 8 : Stapling points |

Figure 3

- | |
|---|
| 2 : Inflatable container to contain gaseous stimulant |
| 3 : Rubber based sealant |
| 5 : Gas Inlet |
| 6 : Plastic delivery tubing |
| 7 : One-way valve |
| 8 : Stapling points |

Figure 4 & 5

- | |
|--------------------------|
| 8 : Stapled points |
| 3 : Sealant |
| 2 : Inflatable container |

Figure 6 & 7

- | |
|---|
| 2 : Inflatable container |
| 6 : Delivery tubing |
| 7 : One-way valve |
| 9 : A canister contained liquefied compressed gaseous stimulant with a holder to control the release of stimulant |
