TRANSPORT FACILITY

ABSTRACT OF THE DISCLOSURE

A transport facility includes an entry detection unit 15 and a deactivation device configured to deactivate the entry detection unit 15. The deactivation device deactivates the entry detection unit 15 if at least either a first detection unit 21 or a second detection unit 22 detects a transport target object W and a third detection unit 23 does not detect the transport target object W. The deactivation device activates the entry detection unit 15 if both of the first detection unit 21 and the second detection unit 22 do not detect the transport target object W and if both of the second detection unit 22 and the third detection unit 23 detect the transport target object W.
