

Abstract

The present disclosure provides a cyclic peptide derivative composition for improving brain function. The present disclosure relates to a composition comprising a compound for improving brain function (in particular, a cognitive function) or a pharmaceutically acceptable salt, solvate or prodrug thereof. More specifically, the composition of the present disclosure is capable of improving memory, in particular, learning memory. The present disclosure also relates to a composition comprising a compound for treating or preventing a cognitive-decline-associated disease or a pharmaceutically acceptable salt, solvate or prodrug thereof.
