

ABSTRACT

The present invention relates to a container
(100) made from a blank material. The container(100)
5 is particularly suitable for storing food stuffs,
including liquid food stuffs. It is versatile in that
it can be assembled so that it has a handle for
carrying the container (100) and it is also possible
to assemble the container (100) so that the handle of
10 the container (100) is tucked away, so that it is
suitable for stacking.
