

ABSTRACT

INFORMATION TRANSMISSION METHOD AND INFORMATION TRANSMISSION APPARATUS, RELATED DEVICE AND STORAGE MEDIUM

An information transmission method, an information transmission apparatus, a network device, a terminal and a storage medium are provided. The method includes: sending first DCI to a terminal, where the first DCI carries first information; the first information is configured to indicate information related to an HARQ process of a downlink channel scheduled by the first DCI to carry a multicast and/or broadcast service, where a CRC of the first DCI is scrambled by a RNTI dedicated to the terminal.
