(54) Title: METHODS, SYSTEMS AND COMPUTER PROGRAM PRODUCTS FOR COORDINATED DISASTER RECOVERY

**FIG.3**

(57) Abstract: Exemplary method, system, and computer program product embodiments for coordinated disaster recovery are provided. In one embodiment, by way of example only, a reconciliation process is performed for resolving intersecting and non-intersecting data amongst disaster recovery systems for takeover operations. An ownership synchronization process is coordinated for replica cartridges via the reconciliation process at the disaster recovery systems. The disaster recovery systems continue as a replication target for source systems and as a backup target for local backup applications. Additional system and computer program product embodiments are disclosed and provide related advantages.
