Concealed Door Hinge And Method Of Installing The Concealed Door Hinge

Abstract

A door hinge, a door set using the door hinge and methods of installing the door set are disclosed. The door hinge comprising: a first hinge plate and a second hinge plate, the first and second hinge plates being rotatably movable relative to each other about a pivot axis, wherein the first hinge plate comprises a first mounting plate for fastening the hinge to a door-panel, wherein the second hinge plate comprises a second mounting plate for fastening the hinge to a door-frame, wherein the first hinge plate is substantially orthogonal to the first mounting plate and the second hinge plate is substantially orthogonal to second mounting plate.
