ABSTRACT

USE OF IVABRADINE AS DIAGNOSTIC AGENT IN THE METHOD OF CORONARY ANGIOGRAPHY BY MULTISLICE COMPUTED TOMOGRAPHY

Use of ivabradine, or 3-{3-[{[(7S)-3,4-dimethoxybicyclo[4.2.0]octa-1,3,5-trien-7-yl]-methyl}(methyl)amino]propyl}-7,8-dimethoxy-1,3,4,5-tetrahydro-2*H*-3-benzazepin-2-one, of its addition salts with a pharmaceutically acceptable acid and of their hydrates, as a diagnostic agent in the method of coronary angiography by multislice computed tomography.
