(54) Title: INFORMATION PROCESSOR FOR DIAGNOSING THE STATE OF A HUMIDITY SENSOR

[Fig. 3]

(57) Abstract: The present invention relates to an information processor. The information processor comprises a diagnostic unit for diagnosing a state of a humidity sensor, the diagnostic unit diagnosing that the humidity sensor is in a deteriorated state when days on which a proportion of detection data of the humidity sensor indicating 100% humidity out of all detection data for one day is equal to or greater than a reference proportion, have persisted for a reference period.
