

SUBMERSIBLE PUMP

Abstract

A submersible pump 10 includes a pump main-body 100 and a strainer 200 disposed so as to cover a suction port 160 of the pump main-body 100, in which the strainer 200 has slits 211 and 212 formed by extending from an outer-peripheral side surface 210a of the strainer 200 at least to a part of a bottom surface 220b.
