(54) Title: BEVERAGE DISPENSER WITH IMPROVED POWDER DOSING SYSTEM

Fig. 1

(57) Abstract: The invention concerns a dispensing machine for producing beverages from a beverage ingredient powder comprising : - at least one powder storing and dosing sub-assemblies, each of them comprising : a buffer tank able to be connected to a food or beverage ingredient powder container, a dosing device for metering a dose of a beverage ingredient powder, - reconstitution means for preparing a beverage from a dose of the food or beverage ingredient powder, wherein each of the buffer tank comprises a tube for guiding the powder from the container connection means to the dosing device, the first portion of said tube emerging on the dosing device being vertical.
