(54) Title: SYSTEM AND METHOD FOR DIGITAL MEASUREMENT OF STEREO VISION

D

Figure 15D

(57) Abstract: A system and method for stereo vision measurement are provided. A three-dimensional visual stimulus is generated. The visual stimulus is composed of a plurality of spatially filtered dot elements configured to isolate stereo function. The visual stimulus is then presented to a user via a display device and input data is received in response to the user viewing the visual stimulus as presented. A stereo performance of the user is then determined from the input data.
