(54) Title: COMFORT FIT SLIP-RESISTANT EYEWEAR SYSTEM

(57) Abstract: An anti-slip eyewear system comprising a nosepiece configured to couple to a bridge of an eyewear frame, the nosepiece comprising a core comprised of a first material and an outer layer at least partially surrounding or overlapping the core and comprised of a second material, the second material having a lower durometer than the first material, wherein the second material creates a plurality of Schallamach waves on an outer surface of the nosepiece when the outer layer of the nosepiece is in contact with at least a portion of a face of a user. The first material may have a durometer greater than about Shore (40A) on the Shore (A) hardness scale and the second material may have a durometer less than about Shore (40A) on the Shore (A) hardness scale.
