(54) Title: MODEL-DRIVEN DASHBOARDING

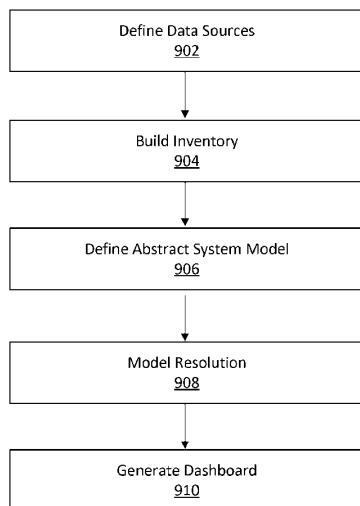

FIG. 9

(57) Abstract: A graphical user interface (GUI) comprising a graphical representation of one or more model elements of a system model of a deployed system infrastructure may be provided. The GUI may be configured to enable a user to: define at least one selector for binding a set of one or more infrastructure elements of the deployed system infrastructure to a first model element and to define at least one indicator to identify at least one stream of metric data for the first model element. The set of one or more infrastructure elements may be bound to the first model element. Responsive to receiving user input defining the at least one indicator, identifying the at least one stream of metric data for the first model element; and updating the GUI to include a representation of: the infrastructure elements bound to the first model element, and the at least one indicator.
