| Coordinated<br>SP Type<br>value | Meaning                                   |
|---------------------------------|-------------------------------------------|
| 0                               | Coordinated SP is for C-OFDMA             |
| 1                               | Coordinated SP is for C-TDMA              |
| 2                               | Coordinated SP is for C-SR / C-BF         |
| 3                               | Coordinated SP is for Joint Transmission  |
| 4                               | Coordinated SP is for Low Latency traffic |
| 5                               | Coordinated SP is for NSEP traffic        |
| 6 – 16                          | Reserved                                  |
