(54) Title: FOULING CONTROL COATING COMPOSITION

(57) Abstract: The invention relates to a fouling control coating composition comprising (i) a siloxane-modified anionic polymer with one or more metallic cations, and (ii) an amine compound having at least one amine group attached to a saturated carbon atom, a boiling point of at least 85 °C, and a molecular weight of at least 70. The coating is particularly useful as a self-polishing fouling control coating.
