(54) Title: SEATING ARRANGEMENT, SEAT UNIT, TRAY TABLE AND SEATING SYSTEM

FIG. 1a

(57) Abstract: A row of a plurality of adjacent seats supported by a support frame. The seat includes a seat back, a seat pan and a leg rest. The leg rest of each seat includes a leg support surface and is mounted relative to the seat frame in a manner to allow it to move between (a) a stored condition and (b) a fully deployed condition where the seat pan and the leg rest support surface are substantially coplanar. The leg rest and seat pan of each seat in the row can cooperate to define a reconfigurable horizontal support surface for at least one passenger.
