

[Name of Document] Abstract

[Summary]

[Problem] The present invention is to provide a composition containing an oxidizing agent and a method for stabilizing an oxidizing agent, which can improve the stability of the oxidizing agent.

[Solution] A composition containing an oxidizing agent of the present invention is characterized in that they contain (A) stannate, (B) an aminocarboxylic acid-based chelating agent and (C) an acid, and the mass ratio of the content of (B) component to the content of (A) component is 0.01 to 35, and the mass ratio of the content of (B) component is pH2 to 5. In addition, (D) a cationic surfactant, (E) a polyoxyethylene alkyl ether type non-ionic surfactant, or (F) a hydrocarbon may be incorporated.
