(54) Title: WALL PANEL

(57) Abstract: A modular wall panel (1) includes two containment sheets (15) and spacer means (7, 8, 9, 30, 31, 32, 50, 52) disposed between the containment sheets. The containment sheets are formed from sheet metal and are designed to receive a poured in settable material such as concrete. The containment sheets have linear stiffening formations extending in a first direction to resist outward bowing of the containment sheets in planes extending in the first direction when the wall panel is filled with the settable material.
