

PATENT OF INVENTION

Line for transfer of fluid with clamping modules

5

ABSTRACT

In this line for transfer of fluid between two ships, the connector-disconnector comprises a flange (20) on one of the joining pieces (4.2), and clamping modules (14) which
10 are fitted on the other joining piece (4.1) such as to be able to be attached to the flange (20), and the manoeuvring shafts (12.1, 12.2) of the butterfly valves pass radially between two modules (14).
