(54) Title: PENTAFLUOROBENZENESULFONAMIDES AND ANALOGS

(57) Abstract

The invention provides methods and compositions relating to novel pentafluorobenzenesulfonamide derivatives and analogs and their use as pharmacologically active agents. The compositions find particular use as pharmacological agents in the treatment of disease states, particularly atherosclerosis and hypercholesterolemia, or as lead compounds for the development of such agents. The compositions include compounds of general formula (I).
