(54) Title: ACTIVE SET UPDATE (ASU) WITH HIGH SPEED DOWNLINK SHARED CHANNEL (HS-DSCH) INFORMATION

(57) Abstract: Because the current RRC: ACTIVE SET UPDATE message presently used in soft handover does not contain HS-DSCH related information, which could be utilized for a Serving HS-DSCH cell change, a separate Radio Bearer Control procedure is needed between the UE (10) and the RNC (20) for carrying out the Serving HS-DSCH cell change. Should HS-DSCH related information - applicable to Serving HS-DSCH cell change - be added to the RRC: ACTIVE SET UPDATE message (32), an unnecessary Radio Bearer Control procedure is avoided, and the drawbacks of the current method are overcome.
