

ABSTRACT

DEVICE FOR CUTTING SHEETS OF MATERIAL

1

2 Device for cutting sheets of material, with a counter (12)
3 for the material to rest on, a blade to cut the material, and
4 a holdfast (11) that can be lowered onto the material by a
5 mechanism (10) and raised off it by a spring (6). When the
6 spring in such a device breaks, the holdfast can drop and
7 injure the operator. The object is to prevent such injuries.
8 An interceptor (7, 8, & 9) accordingly brakes the holdfast
9 when the spring that raises it is broken.

10 Figure 1 of the drawings should accompany the abstract when published.
