

System and Method for Reducing the Size of an Electronic Message on a Mobile Communication Device

ABSTRACT

5 Systems and methods are provided for reducing the size of an electronic message on
a mobile communication device. The mobile communication device may identify address
card information in a received electronic message. The mobile communication device may
then automatically display a reduced version of the electronic message on the mobile
communication device, wherein the address card information is represented by an address
10 card indicia.
