

[ABSTRACT]

SWEETNESS AND/OR MILK FLAVOR ENHANCER

[Problem] To provide a sweetness and/or milk flavor enhancer which can increase the sweetness and/or the milk flavor of a cooked product and therefore enables the reduction of the amount of sweetening agent and/or milk flavor additive to be used.

[Solution] The sweetness and/or milk flavor enhancer according to the present invention contains an oxidized and partially hydrogenated oil or fat having peroxide value of 25 to 300 as an active ingredient. The content of trans fatty acids in the oxidized and partially hydrogenated oil or fat is preferably 5 to 75 wt%. The iodine value of the oxidized and partially hydrogenated oil or fat is preferably 35 to 135.
