(54) Title: INSTRUCTION METHOD TO EFFECT SYSTEMIC REFRAMING THINKING

(57) Abstract: A method and device of exposing, formulating and graphically displaying a mindset is disclosed. Once a mindset is exposed and displayed it can be confronted, criticized and modified with the help of the graphic display in a process known as reframing. After an issue is stated, a concept list is made. Using the concept list, a deliberation space map is generated, the deliberation map representing the mindset is graphically represented. The deliberation map is made of a plurality of deliberation spaces, constructs made of two concepts with a relationship of complementary negation when considered in the context of a third concept. A deliberation space map can be converged to generate a setting map as a preplanning stage for solving the challenge. A deliberation space map can be converged to form a knowledge map as a preservation of the knowledge in all its dynamic aspects. A knowledge map can be used for the presentation of conceptions and their transfer between individuals. A knowledge map can be used as the frame of reference in a discourse of knowledge development between individuals, groups and organizations.
