Pharmacy Workflow Manager

DoseEdge Software version 2.5.0 (DoseEdge v2014.1 IB#25 2014-09-15 08:55 Account#: 99999)

DoseEdge Pharmacy Workflow Manager is not intended to replace the knowledge, judgment or expertise of pharmacists and pharmacy technicians in the preparation of IV admixtures and oral doses. The DoseEdge Software is a software system intended to improve and document workflow in your pharmacy, and help in reducing opportunities for errors. While the software can provide guidance that assists the pharmacist or technician in proper preparation of IV admixtures and oral doses, it cannot, and does not, make any decision regarding dose preparation or assure that the personnel use correct technique or prepare doses in the proper order. Pharmacists and technicians are expected to use the DoseEdge Software in combination with proper training, supplies and techniques and to assume responsibility for the doses they prepare. Baxter Healthcare Corporation and its suppliers disclaim all liability arising from the failure of the pharmacist or technician to use the proper standard of care in the preparation and handling of IV admixtures and oral doses. Use of the DoseEdge service and all related software is subject to all of the terms and conditions of your institution's DoseEdge Service Agreement. DoseEdge Software is a trademark of Baxter International, Inc., or its subsidiaries, registered in the U.S. Patent and Trademark Office. Patented. Please see www.baxter.com/products/patents/
