#	Structure
6072	 Chemical structure 6072: A nucleoside derivative. The sugar is a ribose derivative with a hydroxyl group at the 2' position and a hydroxymethyl group at the 3' position. The base is a pyrimidine derivative. The phosphate group is attached to the 5' carbon of the sugar and is linked to a pyridine ring via an oxygen atom. The phosphate group is also linked to a thioether group (-S-) and a thioester group (-C(=O)O-).
6073	 Chemical structure 6073: A nucleoside derivative. The sugar is a ribose derivative with a hydroxyl group at the 2' position and a hydroxymethyl group at the 3' position. The base is a pyrimidine derivative. The phosphate group is attached to the 5' carbon of the sugar and is linked to a phenyl ring via an oxygen atom. The phosphate group is also linked to a thioether group (-S-) and a thioester group (-C(=O)O-).
6074	 Chemical structure 6074: A nucleoside derivative. The sugar is a ribose derivative with a hydroxyl group at the 2' position and a hydroxymethyl group at the 3' position. The base is a pyrimidine derivative. The phosphate group is attached to the 5' carbon of the sugar and is linked to a phenyl ring via an oxygen atom. The phosphate group is also linked to a thioether group (-S-) and a thioester group (-C(=O)O-).
6069	 Chemical structure 6069: A nucleoside derivative. The sugar is a ribose derivative with a hydroxyl group at the 2' position and a hydroxymethyl group at the 3' position. The base is a pyrimidine derivative. The phosphate group is attached to the 5' carbon of the sugar and is linked to a 4-methylphenyl ring via an oxygen atom. The phosphate group is also linked to a thioether group (-S-) and a thioester group (-C(=O)O-).
6070	 Chemical structure 6070: A nucleoside derivative. The sugar is a ribose derivative with a hydroxyl group at the 2' position and a hydroxymethyl group at the 3' position. The base is a pyrimidine derivative. The phosphate group is attached to the 5' carbon of the sugar and is linked to a 4-methoxyphenyl ring via an oxygen atom. The phosphate group is also linked to a thioether group (-S-) and a thioester group (-C(=O)O-).
6071	 Chemical structure 6071: A nucleoside derivative. The sugar is a ribose derivative with a hydroxyl group at the 2' position and a hydroxymethyl group at the 3' position. The base is a pyrimidine derivative. The phosphate group is attached to the 5' carbon of the sugar and is linked to a quinoline ring via an oxygen atom. The phosphate group is also linked to a thioether group (-S-) and a thioester group (-C(=O)O-).

9067	Chemical structure of compound 9067. It features a pyrimidine ring substituted with a fluorinated sugar moiety (a ribose derivative with a methyl group and a hydroxyl group). The sugar is linked via a phosphate group to a 4-chlorophenyl group. The molecule also contains an isopropyl group and an acetate group.
9068	Chemical structure of compound 9068. It features a pyrimidine ring substituted with a fluorinated sugar moiety (a ribose derivative with a methyl group and a hydroxyl group). The sugar is linked via a phosphate group to a 4-chlorophenyl group. The molecule also contains an isopropyl group and an acetate group.
