

[ABSTRACT]

[Title of Invention] PATCH

The present invention provides a patch comprising a backing layer and an adhesive agent layer, wherein

5 the adhesive agent layer is non-aqueous,

the adhesive agent layer contains nonylic acid vanillylamide, terpene-based resin, rosin-based resin, styrene-isoprene-styrene block copolymer, and liquid paraffin,

10 a mass ratio of a content of the terpene-based resin to a content of the rosin-based resin ((content of the terpene-based resin) / (content of the rosin-based resin)) in the adhesive agent layer is 0.45 to 1.3, and

15 a mass ratio of a content of the styrene-isoprene-styrene block copolymer to a content of the liquid paraffin ((content of the styrene-isoprene-styrene block copolymer) / (content of the liquid paraffin)) in the adhesive agent layer is 0.45 to 1.2.
