

Abstract

5 Acetic acid derivatives of the formula

I

wherein L, M, T and Q have the significance given in the
10 description, can be used for the treatment or prophylaxis of
illnesses which are caused by the binding of adhesive proteins to
blood platelets and by blood platelet aggregation and cell-cell
adhesion. They are manufactured by cleaving protecting groups in
the corresponding protected compounds or by converting the cyano
15 group into the amidino group in corresponding nitriles.
