ME, MG, MK, MN, MW, MX, MY, MZ, NA, NG, NI, NO,
NZ, OM, PA, PE, PG, PH, PL, PT, QA, RO, RS, RU, RW,

(54) Title: SYSTEMS AND METHODS OF PRODUCING PATIENT ENCOUNTER RECORDS

FIG. 1

(57) Abstract: A system for consolidating medical data from multiple devices involved in a patient encounter is provided. The system includes a mobile computing device that acquires, via a medical device interface, identifiers of each medical device, generates association information including the one or more identifiers, and transmits the association information to a server. The server receives and stores one or more medical device case files from the medical devices, receives the association information from the mobile computing device, associates the one or more medical device case files with one another, and produces an integrated data source encounter structure including case data from the one or more medical device case files for subsequent processing.
