(54) Title: STACKED PLATES FILTRATION CARTRIDGE

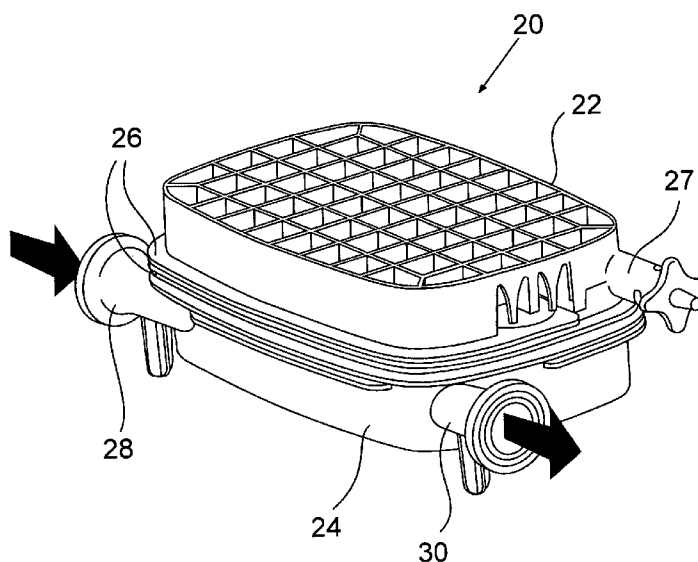

Figure 1

(57) Abstract: A filtration cartridge (20) is provided comprising one or a stack of filtration units (26) sealed to each other at their inner periphery and to end caps (22, 24) eliminating the need for a housing surrounding the stack. Fluid pathways are provided so that filtration of all incoming feed is assured prior to passing from the cartridge as filtrate. The filtration cartridge can be provided with a single outlet (30).
