

Abstract

The invention relates to a printer device (1) as well as a method for building a printer
guide structure (3) of a passenger transport system (5) configured as an escalator or
5 moving walkway in an existing building (7). The printer device (1) comprises at least one
printer guide device (9), a 3D concrete printer device (15), which is arranged such that it
can be moved along the printer guide device (9), and a printer controller (25).
