(54) Title: RENEWABLE STABILIZED NAPHTHA-RANGE HYDROCARBON FEED, THERMAL CRACKING METHOD AND
PRODUCTS THEREOF

FIG. 1

(57) Abstract: The present invention relates to a method comprising thermal cracking, a renewable stabilized naphtha-range hydrocarbon feed usable in such a method and a cracking effluent obtainable by use of such a method. The method of the present invention comprises a step (a) of providing a renewable stabilized naphtha-range hydrocarbon feed, a step (b) of thermally cracking the renewable stabilized naphtha-range hydrocarbon feed in a thermal cracking furnace, optionally together with co-feed(s) and/or additive(s), and a step (c) of subjecting the effluent of the thermal cracking furnace of step (b) to a separation treatment to provide at least a light olefin(s) fraction.
