(54) Title: ADHESIVE COMPOSITION CONTAINING CYCLIC SILOXANES

(57) Abstract: The invention is based on the discovery that certain well-defined functionalized cyclic siloxanes are useful as thermosetting resins for the electronic packaging industry. The functionalized cyclic siloxane compounds described herein can be cured in a variety of ways, depending on the polymerizable moiety incorporated into the compound. Invention cyclic siloxanes are readily prepared via hydrosilation of polyalkyl(hydro)cyclosiloxanes with appropriately functionalized alkenes and/or alkynes.
