

Novel thiochromeno[2,3-c]quinolin-12-one derivatives, preparation
method and application thereof

ABSTRACT OF THE DISCLOSURE

5 The invention provides a series of novel thiochromeno[2,3-c]
quinolin-12-one derivatives. Further, the invention also provides the
preparation method and application of said derivatives, said application
comprises: said derivatives with treating effective amount are prepared
into pharmaceutical compositions for inhibition of topoisomerase type I
10 and II, inhibition of cancer cell growth, further treating cancer.
