(54) Title: TEST PROBE AND METHOD OF MANUFACTURING THE SAME

(57) Abstract: Disclosed is a test probe. The test probe includes a barrel shaped like a barrel; and a terminal including a terminal body portion partially inserted in a first end of the barrel, and a contact portion extending integrally from the terminal body portion to come into contact with a bump terminal of a subject-to-be-tested. The contact portion includes: a tip supporting portion including a supporting main body provided on the terminal body portion and a tip base protruding from a first end of the supporting main body in a horn shape; and a tip portion plated on an outer surface of the tip base with a material having a higher hardness than the tip supporting portion and formed more thickly on an upper portion of the tip base than a lower portion.
